Radiation Safety Officer -- \$1700 per student

This course is designed for the person who wants the highest level of training. Topics covered are:

- | | |
|---------------------------------------|----------------------------|
| Basic atomic theory | Tests performed on devices |
| Measurement and monitoring techniques | Hands on lab work |
| Exposure effects of radiation | Emergency procedures |
| Biological effects of radiation | Proper disposal practices |
| NRC regulations | DOT regulations |

This forty-hour course, based on NUREG 1556, meets the requirement of the NRC and Agreement States for Radiation Safety Officer training. Upon successful completion of the course a certificate is awarded that can be used to apply to the appropriate agency for licensing.

Radiation Safety Officer Review -- \$550 per student

To keep up with the constant changes in Radiation Protection Standards, current RSOs benefit from this in depth review of the principles of radiation safety. Based on NUREG 1556, dose limits, required ALARA programs, record keeping, compliance, and training of plant personnel are some of the topics covered. This fast paced class is designed for active RSOs who have previously taken a 40-hour class. We recommend attending a review course every two to three years.

In Plant Schools -- Call for Pricing and Information

These schools can be customized to meet your needs. Typical classes are a half-day Introduction to Radiation Safety, a one-day Radiation Safety for Gauge Users Course, a two-day SmartPro maintenance course, a one day HART® electronics, or a combination Introduction to Radiation Safety and electronics course.
